

# Precalculus

1 Math Credit

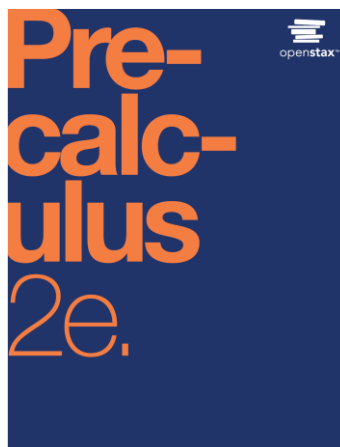

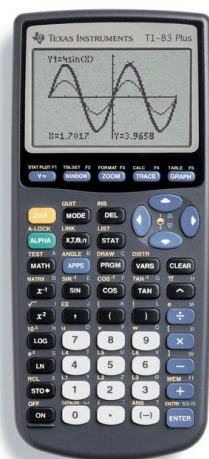

Cost: \$250

Prerequisite: Algebra II and Geometry

Hi everyone!

My name is Hannah Dee (Mrs. Dee), and I will be teaching Precalculus this year. The prerequisites for this course are **Algebra II** and **Geometry**.

We will be using a free online textbook from OpenStax Precalculus, 2e (Paperback ISBN: 978-1711494005). Students will also need a TI graphing calculator (TI 83/84).

Precalculus is exactly what it sounds like - a course to prepare students for advanced math classes, primarily calculus. We will review important algebraic concepts and introduce new concepts that may have been missed or only covered very briefly in other classes. Students will also learn some trigonometry that goes beyond a typical high school geometry course.
